## 1. The example

The **Salzburg Airport W. A. Mozart** (IATA: **SZG**, ICAO: **LOWS**) is located inside the city of Salzburg and is the second largest airport of Austria. The airport was taken into operation on the 16<sup>th</sup> of August 1926 and was named after the composer Wolfgang Amadeus Mozart who was born in Salzburg.

The airport is located about four kilometers west of the center of Salzburg, inside the district named Maxglan, about two kilometers from the German border, next to Ainring and Freilassing. The airports elevation is 430 m a.s.l. on the terrain of the former Untersberger moor and in the vicinity of the enclosed basin of Salzburg. The Untersberg (mountain) is located south of the airport.

(Source: Wikipedia)

## 2. The scenery

The scenery is based on a conversion done by [andreasmx](#) named "[LOWS - Salzburg W.A.Mozart V9](#)", which originally was done by gianni for the MSFS2004. Because of copyright law the scenery was done completely from scratch. Thereby the above mentioned scenery was used as a template included actual information from open sources to build the airport new.

### Charts

are available at <http://www.vacc-austria.org/?page=content/airportinfo&icao=LOWS>. Based on that charts the parking positions and taxiways were built into the scenery. So there shouldn't be any problems when flying online.

During August 2012 the runway 16/34 was renamed to 15/33. This fact is also considered in the scenery.

***In January 2019, the scenery was changed to the Marshaller and the gate control over SAM.***

## Austrian X-Plane Design Group

### 3. Functions (summary)

- Photorealistic scenery
- Rename of runway and taxi signs from August 2012 included
- Compatible to OSM+autogen from PilotBalu
- Realistic ground texture on the airport area
- Parkpositions, taxiways, runways, etc. conform to VACC data
- Vehicles at the apron
- Realistic markings on the apron and taxiways
- Different buildings in the vicinity
- Night textures and realistic lightning \*)
- openable hangar doors and gates (with [HangarOps Package](#)) \*)
- Ground traffic (with [GroundTraffic Plugin](#) from marginal) \*)
- ATC taxilines for AI traffic \*)
- **Parked Aircrafts at Main- and GAC-Aprons (removable) new in V1.1**
- **Compatibel to XP11 an XP-AI-Traffic new in V2.0**
- **Working marshallers at the "W"- and "E"-Stands new in V 3.0 \*)**
- **Hangar doors and access gates can be operated via SAM. new in v. 3.0**

\*) X-Plane 10, 11 only!

### 4. Installation

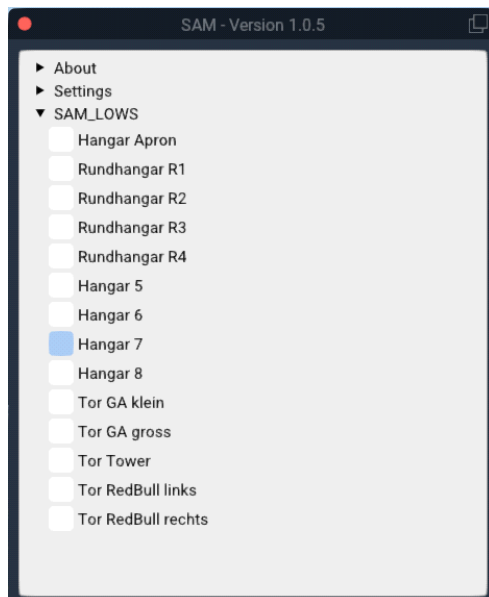

Simply unpack the folder and copy the content into your 'custom scenery' folder of X-Plane. Restart X-Plane and enjoy.

For ground traffic the plugin "GroundTraffic" from "marginal" is needed (see Credits).

**For the Marshallers and the gates you have to install the "SAM - Plugin" from "Threshold"**

If you want to see people at the airport, you have to install the "People-LIB".  
Download at: [http://www.x-plane.at/drupal/People\\_LIB](http://www.x-plane.at/drupal/People_LIB)

## 5. Hangar doors

The gates of the GAC hangars and the hangar on the Main Apron can be opened by the addon "SAM" from "Threshold".

# Austrian X-Plane Design Group

## 6. Gates

The access gates to the airfield area are also animated and can be opened and closed via the "SAM addon":

# Austrian X-Plane Design Group

## 7. Parked aircraft (removeable)

On the two Aprons a few planes are placed to make the airport a little busier. Since these interfere with online flying, they are visible only through the setting of the standby ADF1 to 200 (199-201):

ADF1 standby = 200 (199-201): Aircraft visible  
all other settings: aircraft invisible.

Aircraft visible

Aircrafts invisible

## 8. Recommended settings

To visualize all light effects, HDR should be activated. The higher the settings for "texture resolution" and "airport detail" the better the quality of the scenery but the more affect on the FPS ratio.

## 9. Necessary software:

X-Plane® Version 11.10, 10.25+ or 9.7

People-Library

SAM-Library und Addon from

<https://forum.thresholdx.net/clubs/9-sam-scenery-animation-manager/>

## 10. Comments for the X-Plane 9 verison

Unfortunately some functions of the scenery must be disabled for X-Plane 9 and therefore it will not look like on the pictures which where taken with X-Plane 10.25.

***If you cannot see the buildings in the western part, please delete the scenery LOWI in your "Custom Scenery" folder!***

## 11. Libraries used

SAM-Library

People-Library

## 12. Recommended addons

Although the scenery will work without any addons, we recommend to use the following ones for the whole experience (pictures taken with addons installed):

simheaven\_X-Europe-1, -2, -3 by PilotBalu,

Download from: <http://simheaven.com/simdownloads/x-europe/>
